Announcement of the 6th Annual Meeting of the International MS Cognition Society (IMSCOGS) 2017 in Düsseldorf

Dear Sir, Dear Madam,

Dear Colleagues,

On behalf of the International MS Cognition Society (IMSCOGS) it is our great pleasure to announce the dates of the 6th Annual Meeting which will take place in Düsseldorf, Germany, from Wednesday 7 to Thursday 8, June 2017.

The International MS Cognition Society (IMSCOGS), which was founded in 2011, aims at bringing together researchers and clinicians who are engaged in the care of MS patients and who have a special interest in cognition. With its annual meetings IMSCOGS offers an international platform for discussions on a highly relevant topic which is still underestimated and underrepresented at other conferences.

The target audience for the conference includes neurologists, neuropsychologists, clinical psychologists, neuroradiologists, neuroscientists, nursing professionals, rehabilitation specialists, and other related healthcare professionals. The conference especially encourages young researchers and clinicians to attend and present current work related to the context of the session topics.

Besides poster and platform presentations the 6th annual meeting will hold debate sessions where leading experts will identify areas of uncertainties and refer to still open questions in the field. Thus the 2-day conference will be of high educational value to participants and will offer the opportunity to critically discuss views between practitioners and researchers.

Abstract submission deadline is March 31, 2017. More detailed information on the conference can be found at www.IMSCOGS.com.

The chairs of the IMSCOGS Conference 2017, Professor Iris-Katharina Penner and Professor Hans-Peter Hartung, look forward to welcoming you at what promises to be an exciting event.

Sincerely,

Prof. Iris-Katharina Penner, PhD
