12:10-12:30 Publication and future perspectives (*Nils Hansson, Jonatan Wistrand*)

12:30 Farewell and Lunch

We are currently experiencing one of the most extensive societal transformations in modern history. With the ongoing process of digitalisation, the way people interact, articulating their thoughts and fulfilling their needs has found a range of new channels of communication. The development is evident not least in how health sectors worldwide incorporate digital technologies in their practices.

The interdisciplinary network **Bridging the Baltic: Medicine in the Baltic Sea Region** brings together researchers working on aspects of medical history and medical humanities in the Baltic Sea region. Earlier symposiums were arranged in Lund 2014, Düsseldorf 2019, online 2021, Riga 2021, and Odense 2022.

Arranged by:

The Birgit Rausing Centre for Medical Humanities and The Department of Medical History, Lund University, Sweden,

The Department for the History, Philosophy and Ethics of Medicine, Centre for Health and Society, Heinrich-Heine University, Düsseldorf, Germany
