

Düsseldorf School of Oncology

DSO-Ring-Vorlesung im Winter - Semester 2014/2015

„Tumor Genetics, Carcinogenesis, Epigenetics“

Zeit: jeweils Dienstag 16:30 - 17:30 Uhr

Ort: Seminarraum 22 (Geb. 23.11.03)

Im Anschluss an jede Vorlesungsstunde findet um **17:30 Uhr**
das **Work-in-Progress-Seminar** der DSO-Kollegiaten statt.

Date	Topic	Lecturer
21.10.2014	Hereditary cancers	B. Royer-Pokora <i>Institute for Human Genetics</i>
28.10.2014	Oncogenes of RNA- and DNA-viruses	H. Schaal <i>Inst. for Virology</i>
04.11.2014	Receptor tyrosine kinases in tumorigenesis	M. Kassack <i>Inst. for Pharmaceutical and Medical Chemistry</i>
11.11.2014	p53	C. Mahotka <i>Institute for Pathology</i>
18.11.2014	Function of tumor suppressor genes	W. Schulz <i>Dept. of Urology</i>
25.11.2014	Cancer cytogenetics	H. Rieder <i>Institute for Human Genetics</i>
02.12.2014	Genetic variability in response to carcinogens and drugs	K. Golka IFADO
09.12.2014	Chemical and physical carcinogens	P. Brenneisen <i>Institute for Biochemistry and Molecular Biology</i>
16.12.2014	DNA repair and DNA damage response	N. Schupp <i>Institute for Toxicology</i>
13.01.2015	Mutational patterns in human cancers	W. Göring <i>Dept. of Urology</i>
20.01.2015	Epigenetic mechanisms	W. Schulz <i>Dept. of Urology</i>
27.01.2015	Function of microRNAs in tumorigenesis	P. Landgraf <i>Dept. of Pediatric Oncology</i>
03.02.2015	Role of epigenetic modifications in tumorigenesis	G. Reifenberger <i>Inst. for Neuropatholog</i>
